Stockholm, March 15th, 2013

To whom it may concern,

This is to certify that Qi QI, born 21-03-1989, is a registered student at the KTH Master's programme Distributed Computing - EMDC and is expected to graduate with a Master's degree in September 2014.

The 2-year Erasmus Mundus programme EMDC is a joint Master's programme offered by a consortium with support from the European Union. The medium of instruction of the programme is English.

Participation in an Erasmus Mundus programme requires that the students study at a minimum of two universities within the consortium, where they also will be awarded the corresponding Master's degree. The degree project, carried out during the final semester (30 ECTS) can be done in industry or at a university lab in one of the consortium countries or another European country.

The EMDC consortium consists of the following partner universities:
KTH Royal Institute of Technology, Stockholm, Sweden
IST Instituto Superior Técnico, Lisbon, Portugal
UPC Universitat Politècnica de Catalunya, Barcelona, Spain

Qi QI, has been admitted to EMDC, starting autumn 2012 with the following study track:

1st year: Instituto Superior Técnico, Portugal
2nd year first semester: KTH Royal Institute of Technology, Stockholm, Sweden
2nd year second semester: Instituto Superior Técnico, Portugal

Qi QI, has been awarded a scholarship including the participation cost for two years and a living allowance, amounting to a maximum of €24 000. The scholarship is funded by the European Union and is paid from KTH directly to the student's bank account on a monthly basis from September 2012 until July/August 2014.

For any further questions, please do not hesitate to contact the KTH International Relations Office.

Sincerely,

Karin Knutsson
